VIZI CMY300

The Vizi CMY300 is ADJ's next generation LED Hybrid moving head. It uses a specially designed 300W LED engine that offers massive output for most large venues and event productions. It is a great hybrid utility fixture as it acts as a beam, spot and wash all-in-one with a massive zoom range from 8 to 46-degrees. This allows for designers to get maximum effects from one fixture without having to crowd truss in an installation with multiple fixtures. It also allows for less fixtures to be packed in a truck for production events. What's more, is it comes in a smaller footprint than most other movers in its class. Plus, the Vizi CMY300 offers a CMY color mixing so designers can custom make colors to create a one-of-a-kind lightshow. The fixture has a built-in antenna with ADJ's WiFLY EXR wireless DMX that transmits a signal up to 2500 feet / 700M (line of sight).

The Vizi CMY300 offers motorized focus, motorized zoom, two rotating prisms (one 6-facet linear & one 3-facet circular), 2 GOBO wheels (1 wheel fixed metal & one wheel rotating/replaceable GOBOs).

VIZI CMY 16RX

A true Spot/Beam/Wash hybrid Moving Head fixture, the ADJ Vizi CMY 16RX features dual Prism Layering, GOBO Morphing of dual gobo wheels, motorized zoom and motorized focus. The Vizi CMY 16RX offers a CMY color mixing module so designers can custom make colors to create a one-of-a-kind lightshow.

The Vizi CMY 16RX Moving Head fixture is powered by the revolutionary Philips® Platinum 16R discharge lamp technology (8000˚K, 1,500 hr). The powerful Platinum 16R has an output comparable to a 575W fixture. It also offers a flat, even spot field and even more saturation of colors. RECHARGABLE BATTERY POWERED
PAR Z100 5K

The Par Z100 5K is a modern LED twist to the traditional halogen Par Can. It is powered by a potent 100W cold white C.O.B. (Chip On Board) LED with a color temperature of 5700K. Its output is comparable to a 1000W halogen sealed beam Par. It is equipped with 5 different beam angle options that may be changed by hand. powerCON In/Out allows for the fixture to be daisy chained, while 5-pin DMX control offers a variable strobe rate and 5 different dimming curve options.

The Par Z100 5K allows lighting and stage designers the look of the traditional stage par with the technological conveniences of modern day lighting. The advantages include low power draw, fixture and performers won't get hot on stage, DMX control of dimming and strobe. There are no dimmer packs needed anymore. The fixture comes with a gel frame in which diffusion filters may be inserted to further change the beam angle.
