

C-Quad 63

The C-Quad 63 is a companion to the C24 and future C-series power distribution products from StageSmarts.

The C-Quad 63 distributes a high current supply into four individually protected 63A 3-phase outputs.

- 500A powerlock type input connection.
- 500A powerlock type through connection.
- 250A 4-pole main circuit breaker with adjustable settings.
- Integrated system logging (accessible via USB port).
- Phase and breaker status indicators.
- 4 x 63A 4-pol magnetic-hydraulic output breakers.
- 4 x 63A Harting 5-pole connections.
- 1 x 63A CEE 5-pol connection (output #4).
- 2 x Harting GND protective ground connections.
- 19" (483mm) wide, 7U (311mm) high.

The C-Quad 63A will also be available with 500A Powerlock input only (no through connection) as well as with CEE 5-pole 125A input.
